

Table 2: Analysis of variance of SMD response groups in 84F₆ RIL population derived from a cross ICP 8863 x BRG 3

| Source of variation | df | Mean sum of squares | F value | P value |
|-----------------------------|-----------|----------------------------|----------------|-------------------------|
| Between SMD response groups | 02 | 18516.96 | 38.86615** | 1.47x 10 ⁻¹² |
| Within SMD response groups | 81 | 476.4289 | | |

Note: ** Significant at 1 %
