Table 1 F test for the significance of main agronomic traits in Shanlan upland rice

Factor	df	Plant height	Panicle length	Effective panicle number per plant	Grain number per panicle	1 000-grain weight	Grain yield
Compound Fertilizer	3	1.70	2.08	0.63	10.82**	1.46	5.44*
Paclobutrazol	3	17.87**	8.62**	23.75**	6.43*	3.72	9.83**
Compound Fertilizer×Paclobutrazol	9	5.12**	1.30	2.59*	28.96**	2.76*	5.60**

Note: * and ** represent the significant difference at $P<0.05$ and $P<0.01$ by F test, respectively
