

Table 1 Names, chromosome numbers, genomes, and distribution of 22 species

Wild rice species name	Number of chromosomes	Chromosome group	Distributed
<i>Oryza nivara</i> Sharma et Shastry	24	AA	South Asia, Southeast Asia, Southern China
<i>O.nufipogon</i> W. Griffith	24	AA	South Asia, Southeast Asia, Southern China
<i>Oryza officinalis</i>	24	CC	South asia, Southeast asia, South of this, New guinea
<i>Oryza meyeriana</i>	24	-	Southeast, Southern china
<i>Oryza alta</i>	48	CCDD	Central America, South America
<i>Oryza australiensis</i>	24	EE	Australia
<i>Oryza barthii</i>	24	A ^g A ^g	West africa
<i>Oryza latifolia</i>	48	CCDD	Central America, South America
<i>Oryza brachyantha</i>	24	FF	West Africa, Central Africa
<i>O. barthi</i>	24	A ¹ A ¹	Africa
<i>Oryza eichingeri</i>	24, 48	CC, BBCC	East Africa, Central Africa
<i>Oryza glumaepatula</i>	24	A ^{cu} A ^{cu}	South America, West Indies
<i>Oryza grandiglumis</i>	48	CCDD	South America
<i>Oryza granulata</i>	24	-	South Asia, Southeast Asia
<i>Oryza longiglumis</i>	48	-	New Guinea
<i>Oryza meridionalis</i>	24	-	Australia
<i>Oryza minuta</i>	48	BBCC	Southeast Asia
<i>Oryza punctata</i>	24, 48	-	Africa
<i>Oryza ridleyi</i>	48	-	Southeast Asia
<i>Oryza schlechteri</i>	-	-	New Guinea
<i>Oryza glaberrima</i> Steud.	24	A ^g A ^g	West africa
<i>Oryza sativa</i> L.	24	AA	Asia
